## Illuminators

### 8-Segment LED Ring Light

Enables illumination from eight directions.

- Can be used with MM-400/800 and E-MAX
- RS-232C cable comes standard
- E-BUS cable is required to control with E-MAX

### Fiber-optics Illuminator Set

Offers easily adjustable brightness. The ring fiber illuminator minimizes shadows caused by any unevenness on the workpiece surface. The bifurcated fiber enables illumination from two directions.

- Cannot be used with metallurgical microscope objectives
- Cannot be mounted when using 20x, 50x and 100x measuring microscope objectives

### LED Ring Illuminator

Ideal for use in a production environment as LEDs have long product life. Uses 60 high output white LEDs with a variable intensity control and constant color temperature.

- Cannot be used with metallurgical microscope objectives
- Cannot be mounted when 20x, 50x and 100x measuring microscope objectives are used

### Ring Illuminator Adapter

Can be used to mount fiber-optic, fluorescent lamp, and LED ring illuminator.

- Cannot be mounted with 8-segment LED Ring Light

## Tilting trinocular eyepiece tube

The LV-TT2 tilting trinocular eyepiece tube with built-in reticle offers comfort to all users, regardless of their viewing positions. The optical path changeover of 100:0/20:80 allows simultaneous use of a monitor.

## Manual Nosepieces

A variety of manual control nosepieces are available to suit all needs.

C-N6 nosepiece (brightfield)

L-NBD5 nosepiece (bright/darkfield)

L-NU5 nosepiece (universal)

Note: Dimensions will vary, depending on which stage and eyepiece tube are used.
