

CircleSafe®

CircleSafe® 850A

Physical Characteristics

Red solution with a slight detergent odor, contained in an aerosol package.

Particle Certification

Particles meet or exceed all relevant industry specifications. Certification is included with each shipment.

Particle Color

Red

Average Particle Size

12 µm

AMS Standard

Not applicable.

SAE Sensitivity

Not applicable.

Temperature Limit

120°F Maximum

Related Product Information:

Safety Data Sheet

Technical Bulletin 270

Item

FG-3630

Package Size

Case of 12 x 16 oz. Cans

CircleSafe® 850A is an aerosol spray can of Mi-Glow® 601 red particles and liquified Wetting Agent 771 formulated in water media. It's designed to be used with visible light inspection for detecting discontinuities found in structural fabrications and weldments. Its higher particle concentration provides heavier indication buildup for easy detection. CircleSafe® 850A can be further enhanced when used with a UV-A light or blue light. This aerosol is packaged in a carbon dioxide propellant for odor-free, fume-free, non-combustible inspection.
